Scholarship Program*

Description :-

The Application Tracker aims to solve these challenges by offering a unified platform where users can store, organize, and track all their applications in one place. It allows them to upload necessary documents, receive automated reminders, and monitor status changes easily. The system enhances clarity by showing which applications are submitted, pending, under review, or completed. Additionally, it helps users prioritize tasks, avoid duplication, and analyze their application progress over time. By simplifying the entire process, the Application Tracker reduces stress, increases productivity, and ensures that no opportunity is lost due to poor organization or tracking.

Regards :-

- Thanks to Magic bus for acquiring me the wonderful skills about the booming skills in the current market .
- Thanks to IBM (International Business Machines)
